

## Why to choose LianSheng International?

When you work with Liansheng International you'll benefit from following commitments we make to you...

### 1. Fast response to all inquiries.

We commit to responding to your enquiries within 48 hours, so you get the answer you need right away.

### 2. Express carriers around the world to assure no delivery delays

Express tracking No. will be emailed or faxed after each shipment. On time delivery will meet your urgent production need.

### 3. Quality Prevails in the Marketplace

Take precautionary principle to make sure great quality instead of solving problems when claim happened . We find out the weak line of the whole process in advance and fix it .Of course, we have several strict QC during and after the production.

### 4. Flexible payment terms

We offer flexible payment terms to long-term relationship customers.

### 5 .Keeping you informed all the time

In the rare event of a problem occurring with an order, we would message you in a minute and keep you informed as we resolve the problem.

Any concerns will immediately be passed on to manager to handle, which means you will be in full control and know exactly what is happening with your order at all times.

### 6.Highly trained, dedicated personnel

You will be working with highly trained personnel. Our team always locate the first-hand stock source to provide the most competitive price.

All customers can get fast, friendly, expert help from our sales.

### 7.Strong technic backup

We have National engineering Research Center of Synthetic Fiber Product Dept which have all the top experts of the industry line in China work for us. So we can offer the technic backup anytime for the customers in their earlier R&D process & the producing process by offering the effective suggestion to solve problems. This is our absolutely exclusive advantage that impacts "Total Cost of Ownership".

### 8.Offer the integrated logistics activity

Our supply will be matched with your production and assembling. Our production and logistic will be elastic as required. Or we can arrange effective stock management to decrease stock in the whole supply chain ,

In this way , We will help to decrease the cost for customer .
